SUMMARY

Computer Science undergraduate with hands-on experience building AI, AR, and software solutions, combining technical execution with user-centered problem solving. Passionate about developing scalable, product-driven systems regarding applied AI, software engineering, and user-centered problem solving to create meaningful digital solutions across education, productivity, and real-world technology use cases.

EDUCATION

Universitas Padjadjaran – Bachelor of Computer Science
GPA: **3.84/4.00**

Aug 2023 – Present
Jatinangor, Indonesia

EXPERIENCE

TEDxPadjadjaran University
Website Associate - Frontend Developer

Apr 2026 – Present
Jatinangor, Indonesia

- Built responsive frontend sections and reusable UI components for the TEDx event website, translating design requirements into production-ready pages.
- Implemented interactive page layouts, animation-ready sections, and asset-driven visual experiences while maintaining consistency with TEDx branding.
- Collaborated with cross-functional teams to align interface behavior, content structure, and user experience before deployment.

Coding Camp powered by DBS Foundation
AI Engineer Cohort

Feb 2026 – Present
Remote

- Selected from **50,000+** applicants to participate in an intensive scholarship-based technology program focused on developing AI, software engineering, and real-world product-building skills.
- Bridging AI engineering and product problem-solving by developing ML-driven recipe matching features for a capstone team project addressing meal-planning fatigue and food waste.

Department of Computer Science, Universitas Padjadjaran
Laboratory Teaching Assistant

Feb 2025 – Dec 2025
Jatinangor, Indonesia

- Instructed practical sessions for **3 core courses**: Data Structures, Numerical Methods, and Algorithms & Programming.
- Mentored and evaluated **120 students**, providing personalized guidance that contributed to an **89% passing rate**.
- developed quizzes, debugging tasks, and grading rubrics to ensure objective assessment and consistency across lab groups.

Center for Innovation in Teaching and Learning (PIPP), Unpad
Technical Product Lead

Aug 2025 – Dec 2025
Jatinangor, Indonesia

- Led end-to-end product development for an AR simulation product called **TITRA SIMS**, successfully creating a digital alternative that improved safety and eliminated chemical reagent dependency for **150+** pharmacy students per semester.
- Managed cross-functional stakeholders, partnering directly with the Faculty of Pharmacy subject matter experts to translate complex academic requirements into actionable technical specifications.
- Delivered a **90%** functional MVP for academic trial by prioritizing core features, mapping user flows, and managing the development lifecycle in Unity.

- Architected the digital product identity across **10+ responsive interfaces**, deploying rigorous Swiss Design grid principles and dynamic visual aesthetics to elevate brand maturity and successfully drive **20,000+** user interactions.
- Collaborated with developers to ensure **100% design-to-code accuracy**, maintaining visual consistency from wire-frame to deployment.

LEADERSHIP AND ORGANIZATIONS

Department of Computer Science, Universitas Padjadjaran
Head of Laboratory Assistant

Jan 2026 – Present
Jatinangor, Indonesia

- Improved practicum operations for **10+** Computer Science courses by coordinating assistant workflows, standardizing evaluation processes, and monitoring student support quality, resulting in an improved pass rate, reduced complaints, and **150+** students supported

HIMATIF FMIPA Unpad
Head of IT Development

Feb 2024 – Dec 2025
Jatinangor, Indonesia

- created strategic roadmaps and training curriculums for **3 competition tracks**, mentoring **3 teams** that became finalists in national and international competitions.
- Spearheaded a new B2B IT consultancy service line, generating over IDR textbf30 million in revenue by identifying client needs and delivering custom digital solutions.
- Supervised **3 student clubs** covering Cyber Security, Data Science, and Game Development, while supporting the development of Web and IoT-based systems.

IFEST: Informatics Festival – HIMATIF Unpad
Event Director

Apr 2025 – Oct 2025
Bandung and Jatinangor, Indonesia

- Directed the 2025 festival edition, managing an **IDR 35 million+ prize pool** and attracting **1,000+ participants** across event branches.
- Pioneered the department's first-ever **Hackathon** as a flagship program to expand IT competition and innovation activities.
- Led and synchronized **100+ committee members** across Event, Technopreneur, Competition, and Seminar divisions to ensure timely deliverables.
- Secured external partnerships and drove digital engagement strategies that accumulated **1 million+ total content views**.

CBS: Character Building Season – HIMATIF Unpad
Head of Events

May 2024 – Oct 2024
Jatinangor, Indonesia

- Orchestrated the technical execution of the department's orientation program, onboarding **90 new students** with a **99% retention rate**.
- Managed weekly sessions over **3 months**, coordinating schedules for **20+ guest speakers** and alumni.
- Led a team of **4** to execute detailed rundowns, timekeeping, and event flow coordination without major technical delays.

Five Cyber Community
Head of Programming

Nov 2021 – Nov 2022
Bandung, Indonesia

- Led a development team to build and deploy **3 web applications** for the student council, serving **900+ active students**.
- Designed a foundational programming curriculum and conducted weekly training sessions for **10+ junior members**.

SELECTED PROJECTS

SUARAUNPAD

Feb 2026 – May 2026

Software Engineering Course – Student Advocacy Platform

- Developed a student advocacy platform for Universitas Padjadjaran students to submit reports, raise aspirations, and participate in policy-related voting.
- Designed core product workflows for issue reporting, policy feedback, and student voice aggregation to support more transparent campus decision-making.

ZICHARA

Feb 2026 – May 2026

Human-Computer Interaction Course – AR Hanzi Learning Application

- Built an augmented reality learning application that helps users learn Hanzi characters and Pinyin through interactive visual guidance.
- Defined the core user journey and product vision for an AR-driven educational tool, increasing beginner engagement in Mandarin character recognition by replacing traditional friction points with interactive, spatial learning flows.

TITRA SIMS

Aug 2025 – Dec 2025

Android-based Augmented Reality Laboratory Simulation

- Built an Android-based AR simulation application using **Unity and Vuforia** to digitize pharmaceutical titration learning into interactive step-by-step modules.
- Implemented AR learning flows that guide users through laboratory procedures, reagent handling concepts, and titration practice in a safer virtual environment.

SUSTAINABITE

Jul 2025 – Aug 2025

GEMASTIK 2025 – UI/UX Design and Research Proposal

- Conducted user research and applied **Design Thinking** to define core product requirements for a platform addressing MSME food distribution challenges.
- Designed and validated high-fidelity prototypes in Figma, achieving an **8.8/10** usability score through structured user testing sessions and iterative feedback loops.
- Developed a sustainable go-to-market business model connecting MSMEs with end-consumers, aligning product strategy with SDG impact goals.

PILKETOS SMAN 5 Bandung

Sep 2022

Web-based E-Voting System

- Engineered a secure web-based e-voting system for the Student Council election, serving **900+ active students**.
- Implemented real-time vote counting and validation features, eliminating invalid votes and reducing tabulation time by **80%**.

CERTIFICATIONS

- Belajar Fundamental Deep Learning: Dicoding Certification (2026)
- Membangun Proyek Deep Learning Tingkat Mahir: Dicoding Certification (2026)
- Belajar Machine Learning untuk Pemula: Dicoding Certification (2026)
- Memulai Pemrograman dengan Python: Dicoding Certification (2026)
- Belajar Dasar AI: Dicoding Certification (2026)
- Principle for UX Design: Linkedin Certification (2026)
- Agile Software Development: Linkedin Certification (2026)
- UX Foundations: Prototyping, Linkedin Certification (2025)
- C# and .NET Essential Training: Linkedin Certification (2025)

SKILLS & INTERESTS

Technical	Python, C++, C#, Javascript, TypeScript, PHP, Java, SQL, React, Next.js, GSAP, Express.js, PostgreSQL, Flask, Tailwind CSS, Laravel, RESTful API, Docker, CI/CD, Machine Learning, Deep Learning, Data Preprocessing, Model Evaluation, Data Visualization, TensorFlow, Pandas, NumPy, Git, GitHub, VS Code, Unity, Vuforia, MySQL, Figma, PRD, User Research.
Interests	Software Engineering, AI Engineering, Frontend Development, UI/UX Design & Research, Product Management, Project Management, Technology Consulting, Technical Leadership & Management, Data Analysis, Augmented Reality, Quality Assurance, Backend Development, System Design & Architect, Algorithms, CS for Education, Mathematics.
