SUMMARY

Computer Science undergraduate with experience identifying business and user problems, translating stakeholder requirements into product roadmaps, and coordinating cross-functional technology delivery. Led digital product initiatives across education, property, AI, and event platforms, including launching a B2B technology service that generated IDR 30M+ in revenue and completing 90% of a planned MVP scope within one semester. Brings a combination of product thinking, technical understanding, stakeholder communication, and execution to build solutions that are commercially relevant, feasible, and aligned with user needs.

EDUCATION

Universitas Padjadjaran – Bachelor of Computer Science

GPA: **3.87/4.00**

Aug 2023 – Present

Jatinangor, Indonesia

EXPERIENCE

TEDxPadjadjaran University

Website Associate - Frontend Developer

Apr 2026 – Jul 2026

Jatinangor, Indonesia

- Increased website visitors by 76%, reaching 2,174 visitors and 8,685 page views within 30 days, by launching the TEDx-PadjadjaranUniversity platform and using audience-journey data to optimize event discovery and registration.
- Improved the digital attendee journey across event discovery, ticketing, registration, and sign-in, reducing bounce rate by 6 percentage points to 38% and supporting 100+ event attendees.

Coding Camp powered by DBS Foundation

AI Engineer Cohort

Feb 2026 – Jun 2026

Remote

- Selected from 50,000+ applicants for an intensive AI Engineering scholarship focused on deep learning, scalable software development, and production-grade ML workflows.
- Completed a 934-hour AI Engineer program with an overall score of 87.90/100 (Grade A), covering machine learning, deep learning, and the fundamentals of software development for AI Engineering.
- Earned 94/100 (Grade A) for a 250-hour capstone project by collaborating in a cross-functional team to deliver an AI-powered digital product.

Department of Computer Science, Universitas Padjadjaran

Laboratory Teaching Assistant

Feb 2025 – Dec 2025

Jatinangor, Indonesia

- Instructed practical sessions for 3 core courses: Data Structures, Numerical Methods, and Algorithms & Programming.
- Mentored and evaluated 120 students, providing personalized guidance that contributed to an 89% passing rate.

Center for Innovation in Teaching and Learning (PIPP), Unpad

Technical Product Lead

Aug 2025 – Dec 2025

Jatinangor, Indonesia

- Led the end-to-end delivery of TITRA SIMS, launching a zero-cost AR laboratory alternative for 150+ pharmacy students per semester while eliminating reliance on chemical reagents.
- Converted academic requirements into a prioritized product roadmap, aligning cross-functional stakeholders and delivering a 90%-functional MVP within one semester for academic trials.

TEDxPadjadjaran University

Website Associate – UI/UX Designer

Mar 2025 – Jul 2025

Jatinangor, Indonesia

- Accelerated frontend deployment for the TEDx event website by building 30+ reusable UI components using Figma, translating design requirements and user needs into a production-ready platform that supported 5,000+ user interactions.

- **Eagle Tree Property:** Digitized property-brokerage workflows for PT Denadi Mitra Propertindo by translating business requirements into a centralized listing platform covering inventory categorization, location management, and agent lead generation.

LEADERSHIP AND ORGANIZATIONS

Department of Computer Science, Universitas Padjadjaran
Head of Laboratory Assistant

Jan 2026 – Jun 2026
Jatinangor, Indonesia

- Led 30+ laboratory assistants in standardizing practicum operations across 10+ Computer Science courses, improving workflow coordination, evaluation consistency, and academic support for 150+ students.
- Co-developed Praktis, an integrated practicum management platform that centralized user access, grading, and academic workflows, replacing fragmented tools with a scalable departmental system.

HIMATIF FMIPA Unpad
Head of IT Development

Feb 2025 – Dec 2025
Jatinangor, Indonesia

- Created strategic roadmaps and training curriculums for 3 competition tracks, mentoring 3 teams that became finalists in national and international competitions.
- Launched and commercialized a new B2B technology-consulting service line, generating IDR 30 million+ in revenue by identifying client needs, defining tailored value propositions, and overseeing solution delivery.
- Supervised 3 student clubs covering Cyber Security, Data Science, and Game Development, while supporting the development of their own independent projects.

IFEST: Informatics Festival – HIMATIF Unpad
Event Director

Apr 2025 – Oct 2025
Bandung and Jatinangor, Indonesia

- Directed the end-to-end delivery of a multi-program technology festival, allocating an IDR 35 million+ prize pool and coordinating cross-functional execution to attract 1,000+ participants.
- Pioneered the department's first-ever Hackathon as a flagship program to expand IT competition and innovation activities.

CBS: Character Building Season – HIMATIF Unpad
Head of Events

May 2024 – Oct 2024
Jatinangor, Indonesia

- Orchestrated the technical execution of the department's orientation program, onboarding 90 new students with a 99% retention rate.
- Led a team of 4 while coordinating cross-functional execution with 90+ committee members, ensuring seamless rundowns, timekeeping, and event flow without major delays.

Five Cyber Community
Head of Programming

Nov 2021 – Nov 2022
Bandung, Indonesia

- Led a development team to build and deploy 3 web applications for the student council, serving 900+ active students.
- Designed a foundational programming curriculum and conducted weekly training sessions for 10+ junior members.

SELECTED PROJECTS

Archiver
Self Hosted Personal Cloud & Media Server

July 2026

- Engineered a self-hosted media cloud using Next.js, Go, PostgreSQL, Redis, and MinIO to centralize long-term file archiving beyond local storage.
- Established a scalable development foundation for multipart uploads, media streaming, and asynchronous processing using Docker Compose and structured Git workflows.

Praktis
Secure Praktikum Management System for Practicum Operation at CS Unpad

June 2026

- Co-developed an integrated practicum management platform using Next.js and FastAPI to centralize modules, attendance, grading, and account administration.

- Implemented secure authentication and automated account onboarding, reducing manual credential handling and enabling scalable role-based workflows.

YOURI AI-Service

Feb 2026 – June 2026

DBS Dicoding Capstone Project - AI Backend Microservice for Smart Cooking Assistant

- Delivered an AI-powered decision-support service for recipe discovery and ingredient substitution, achieving 88% matching accuracy by integrating TensorFlow inference with FastAPI and MongoDB.
- Implemented secure asynchronous processing through background tasks and polling-based retrieval, maintaining responsive backend operations during compute-heavy inference workloads.

SUARAUNPAD

Feb 2026 – June 2026

Software Engineering Course – Student Advocacy Platform

- Engineered a scalable student advocacy platform using React and Next.js, successfully delivering core tech workflows for issue reporting and policy voting to support a target user base of 1,000+ students.
- Validated product usability and adoption readiness, achieving an 80.0/100 SUS score and a 6.0/7.0 system-efficiency rating through structured User Acceptance Testing.

NYC MAYORAL ELECTION SENTIMENT ANALYSIS

Aug 2025 – Dec 2025

Data Mining Course – NLP-Based Electoral Intelligence & Public Opinion Analytics

- Built an end-to-end social-listening pipeline that transformed 1,189 YouTube records across three candidates into analysis-ready insights through automated ingestion, cleansing, filtering, and entity mapping.
- Expanded candidate-positioning analysis across 3 candidates and 6 voter segments by analyzing 300 public-opinion records with a DeBERTa-based pipeline comparing sentiment, stance, favorability, and up to 15 recurring themes per segment

SUSTAINABITE

Jul 2025 – Aug 2025

GEMASTIK 2025 – UI/UX Design and Research Proposal

- Defined the value proposition and product requirements for a food-redistribution platform addressing MSME inventory inefficiencies and Indonesia’s annual food-waste challenge.
- Synthesized user-research findings into prioritized product recommendations and validated critical user journeys, achieving an 8.8/10 usability score through iterative testing.

CERTIFICATIONS

- EF SET English Certificate - C1 Advanced: EF SET Certification (2026)
- Deep Learning Fundamentals: Dicoding Certification (2026)
- Building Advanced-Level Deep Learning Projects: Dicoding Certification (2026)
- Introduction to Machine Learning: Dicoding Certification (2026)
