

PORTFOLIO **AIDAN ISMAIL**

ABOUT ME

Hello, my name is Aidan Ismail,
I love Building and Designing digital solutions!

Experience

- April 2026 - Present **TEDxPadjajaranUniversity 2026**
Front-End Developer
- Feb 2026 - Present **DBS Foundation Coding Camp**
AI Engineer Cohort
- Aug 2026 - Dec 2025 **PIPP Unpad**
Product Lead/ Unity Engineer
- Mar 2025 - Jul 2025 **TEDxPadjajaranUniversity 2025**
UI/UX Designer
- Jan 2025 - Dec 2025 **Himatif FMIPA Unpad**
Head of IT Development

Interests

- Software Engineering
- Applied AI
- Product Management and Design
- Data Stuffs
- Tech Consulting

Education

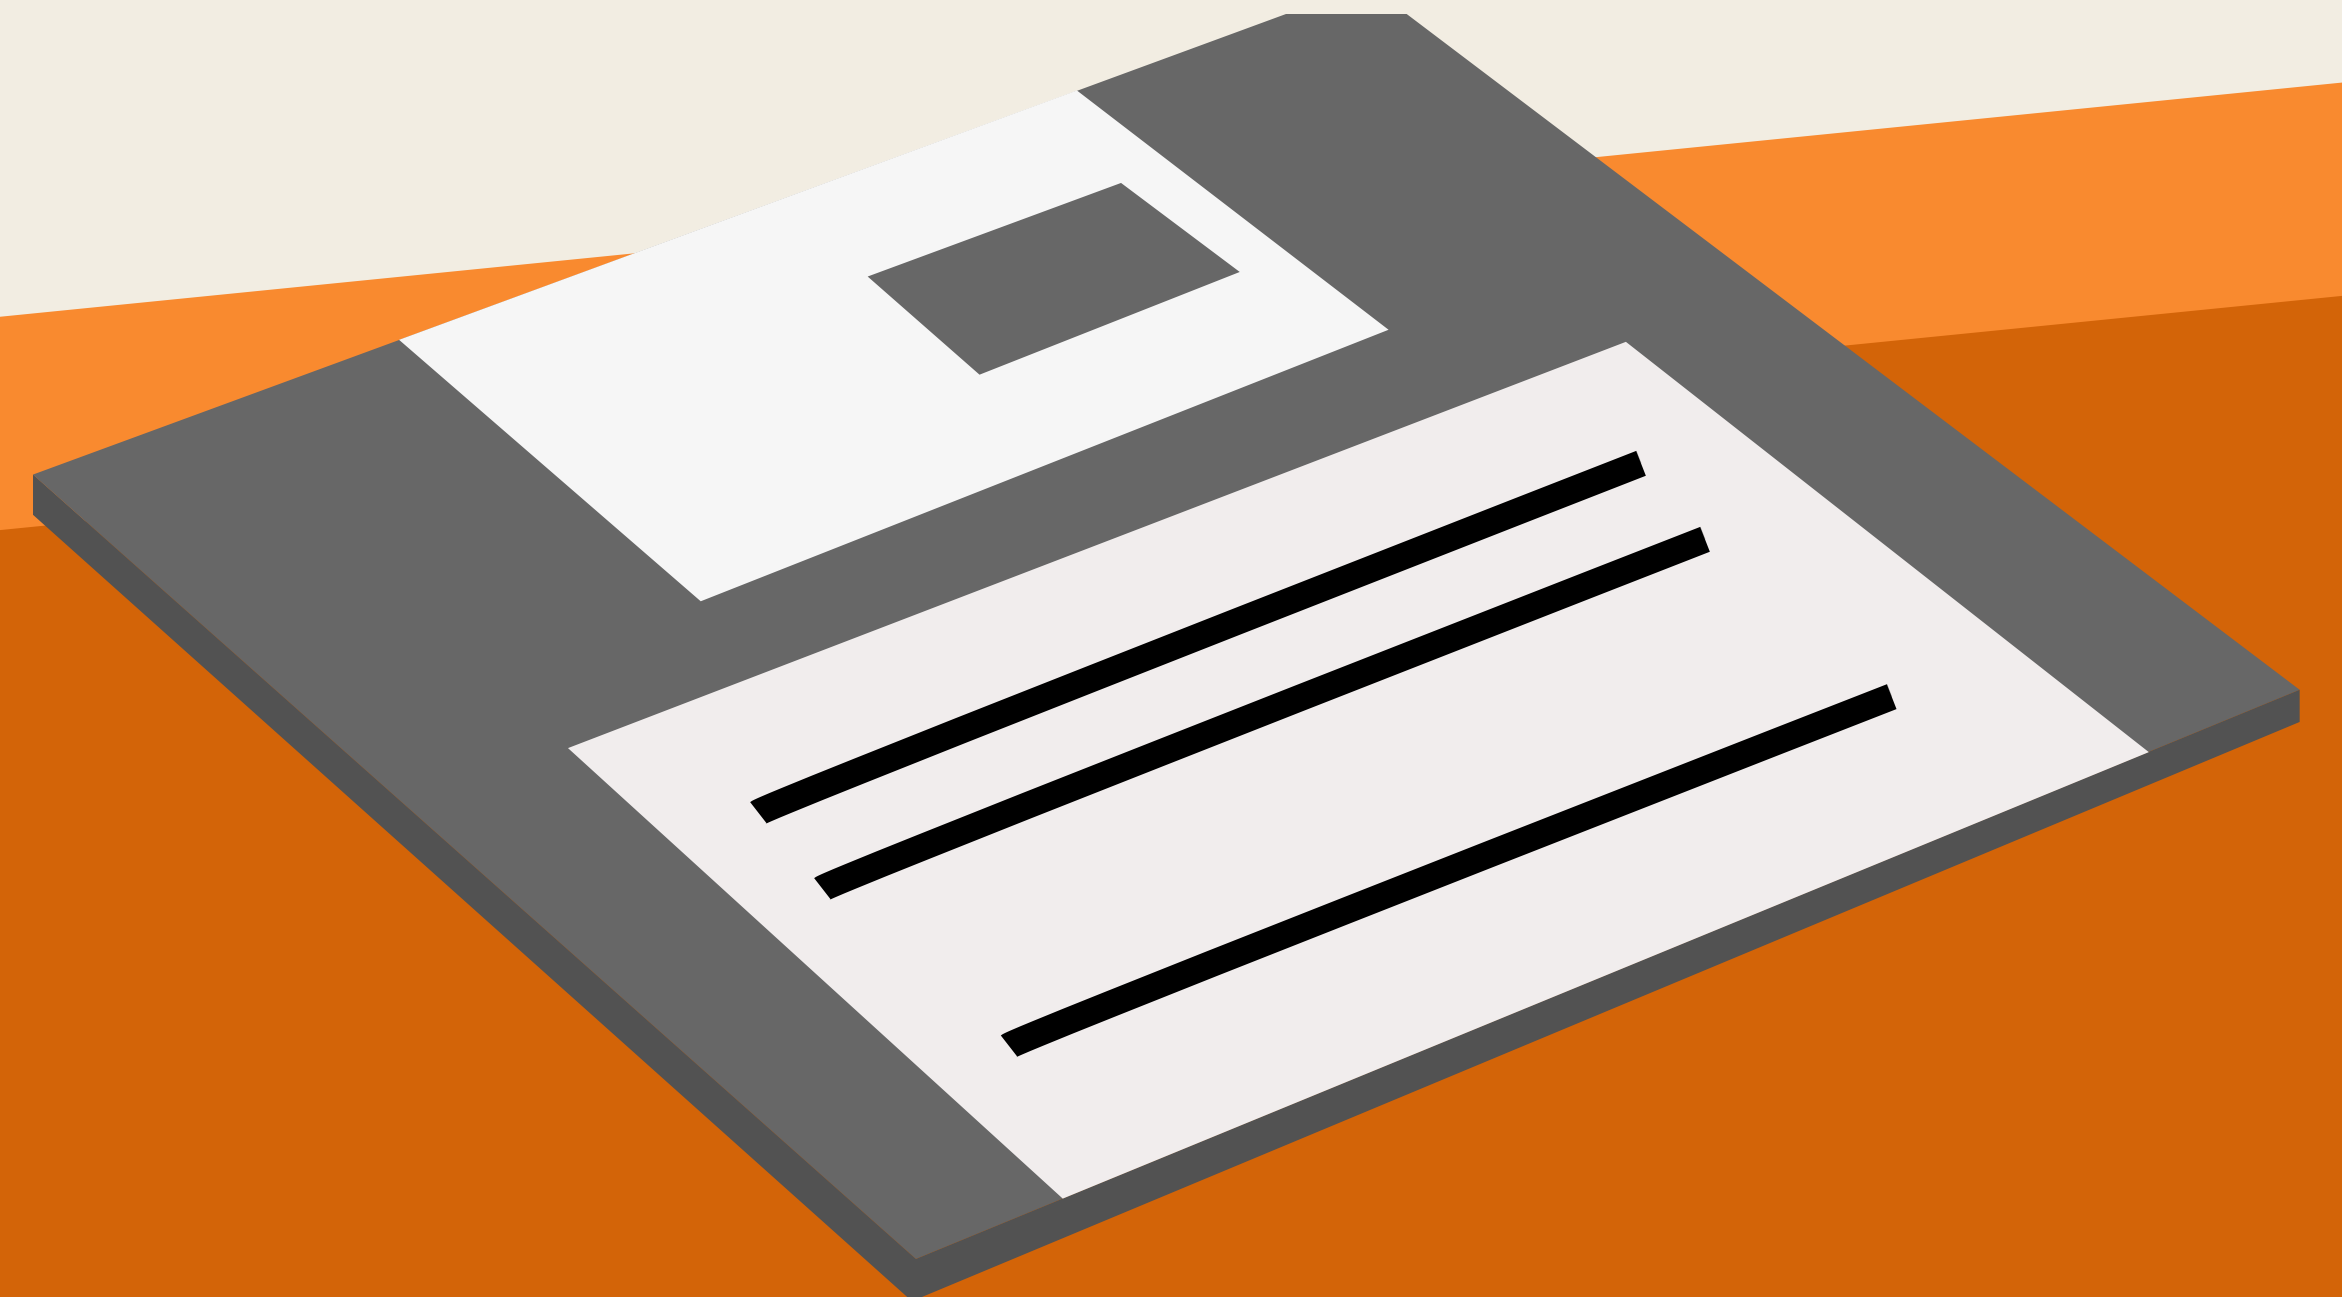

- 2023 - Present
Universitas Padjadjaran
Computer Science

PROJECTS

Design is a continuous pursuit of solving human problems. Explore a curated timeline of my work, where I blend user-centric research, visual hierarchy, and interaction design to craft meaningful digital products.

Fun fact: All of the assets here that you see are made by me!

SUARAUNPAD

Role: Front-End Developer & Product Designer

Year: 2026

About

Designed core user workflows to centralize student voices into a seamless advocacy platform. Serving a target base of 1,000+ students, the platform achieved an 80.0/100 System Usability Scale (SUS) score and a 6.0/7.0 efficiency rating through rigorous User Acceptance Testing.

TEDxPU 2026

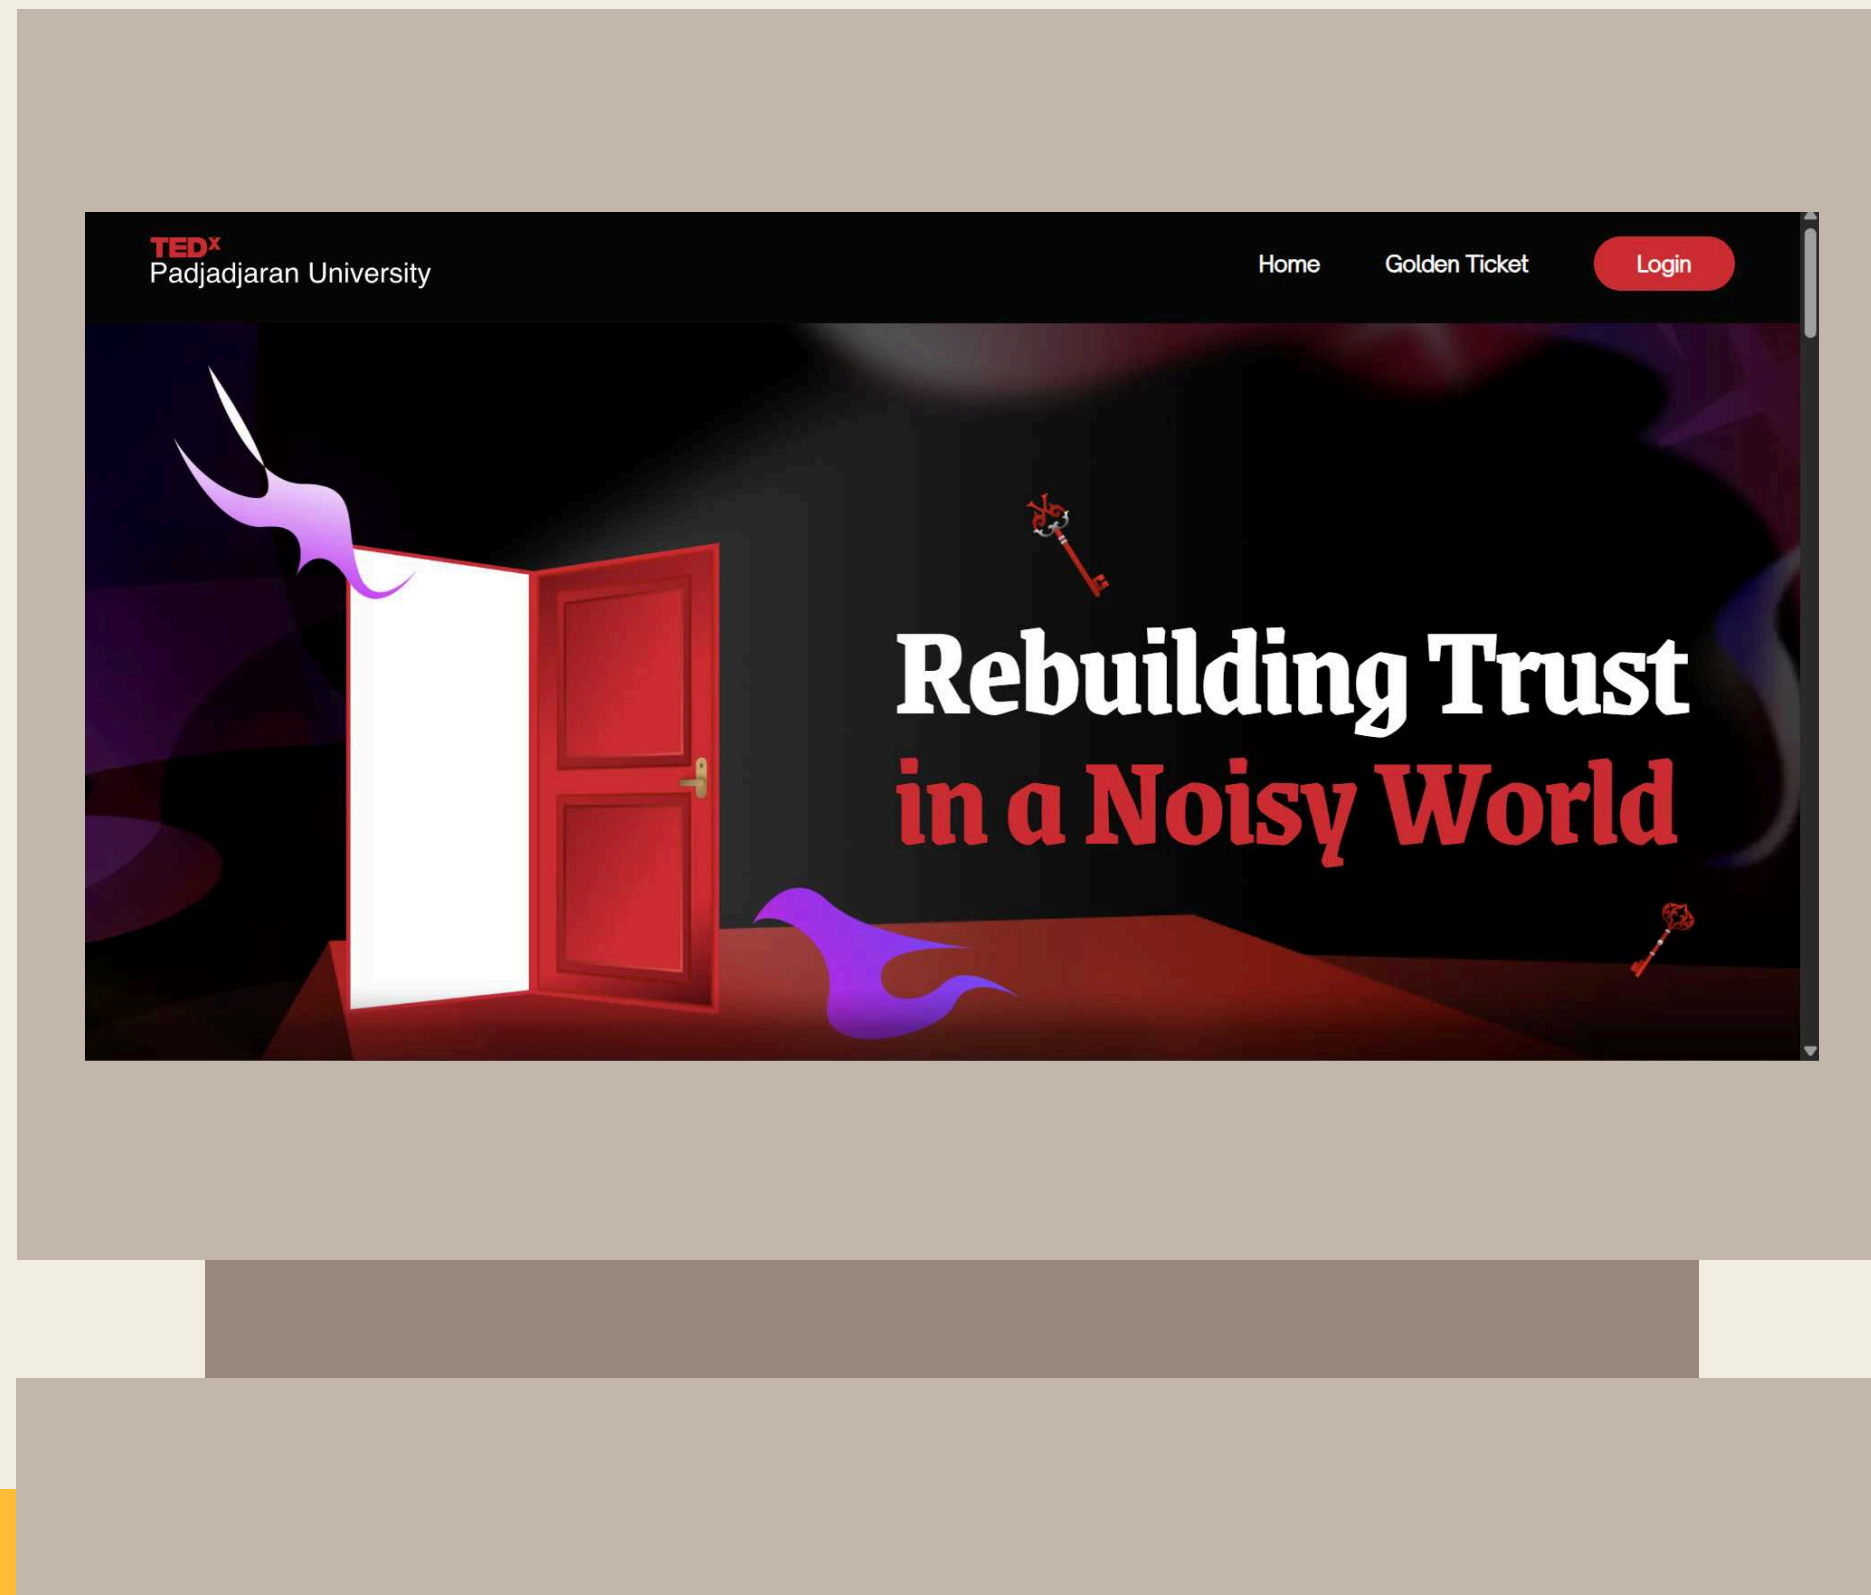

Role: Front-End Developer

Year: 2026

About

Optimized the digital attendee journey across event discovery, ticketing, and registration using audience-journey data. This user-centric redesign reduced bounce rates by 6% and increased web traffic by 76%, driving 8,685 page views in 30 days while maintaining strict TEDx branding.

ZICHARA

Role: Unity Developer & Product Designer

Year: 2026

About

Addressed beginner pain points in learning Hanzi by mapping an end-to-end user journey for an AR educational tool. By replacing static barriers with interactive spatial learning flows, the immersive interface significantly increases engagement in Mandarin character recognition.

Link: <https://bit.ly/zichara>

TITRA SIMS

Role: Unity Developer & Product Designer

Year: 2025

About

Led the end-to-end product design of a zero-cost AR simulation that resolves the safety risks of traditional labs. By translating academic requirements into a prioritized roadmap, I delivered an intuitive, 90%-functional MVP within a single semester that safely serves 150+ pharmacy students.

TEDxPU 2025

Role: UI/UX Designer

Year: 2025

About

Architected over 10 responsive interfaces by building 30+ reusable Figma UI components. Grounded in rigorous Swiss Design grid principles, this cohesive visual system translated complex requirements into an accessible platform that drove massive user interaction.

SUSTAINABITE

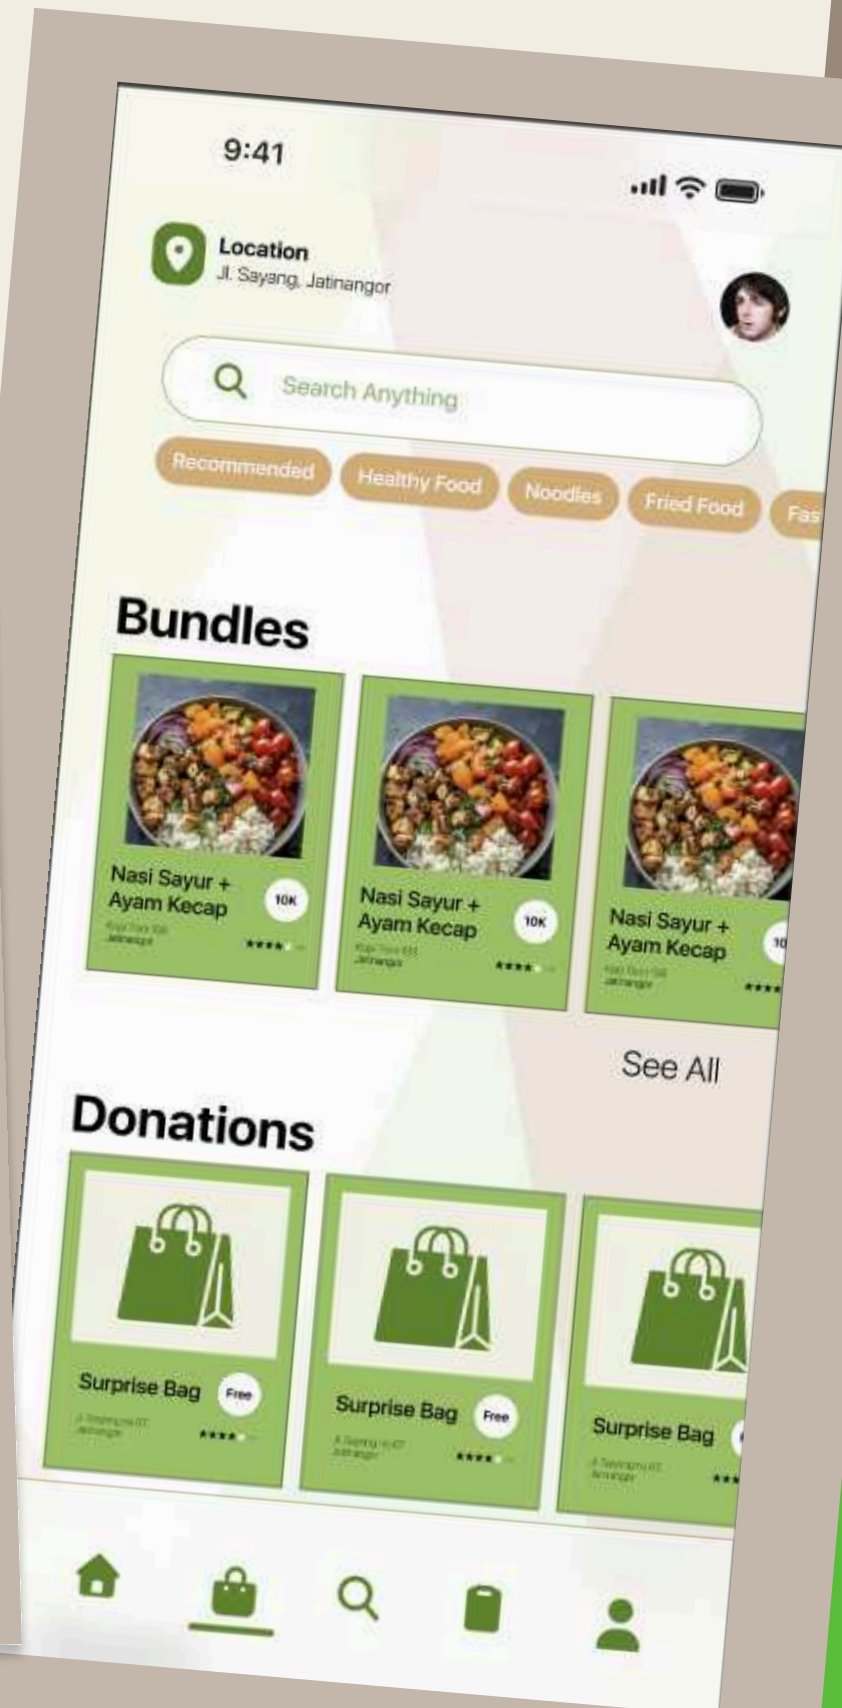

Role: UI/UX Designer and Researcher

Year: 2025

About

Defined product requirements and critical user journeys for a platform solving MSME inventory inefficiencies and food waste for GEMASTIK 2025. By synthesizing user research into prioritized features, the validated prototypes achieved an impressive 8.8/10 usability score through iterative testing.

PILKETOS 2023

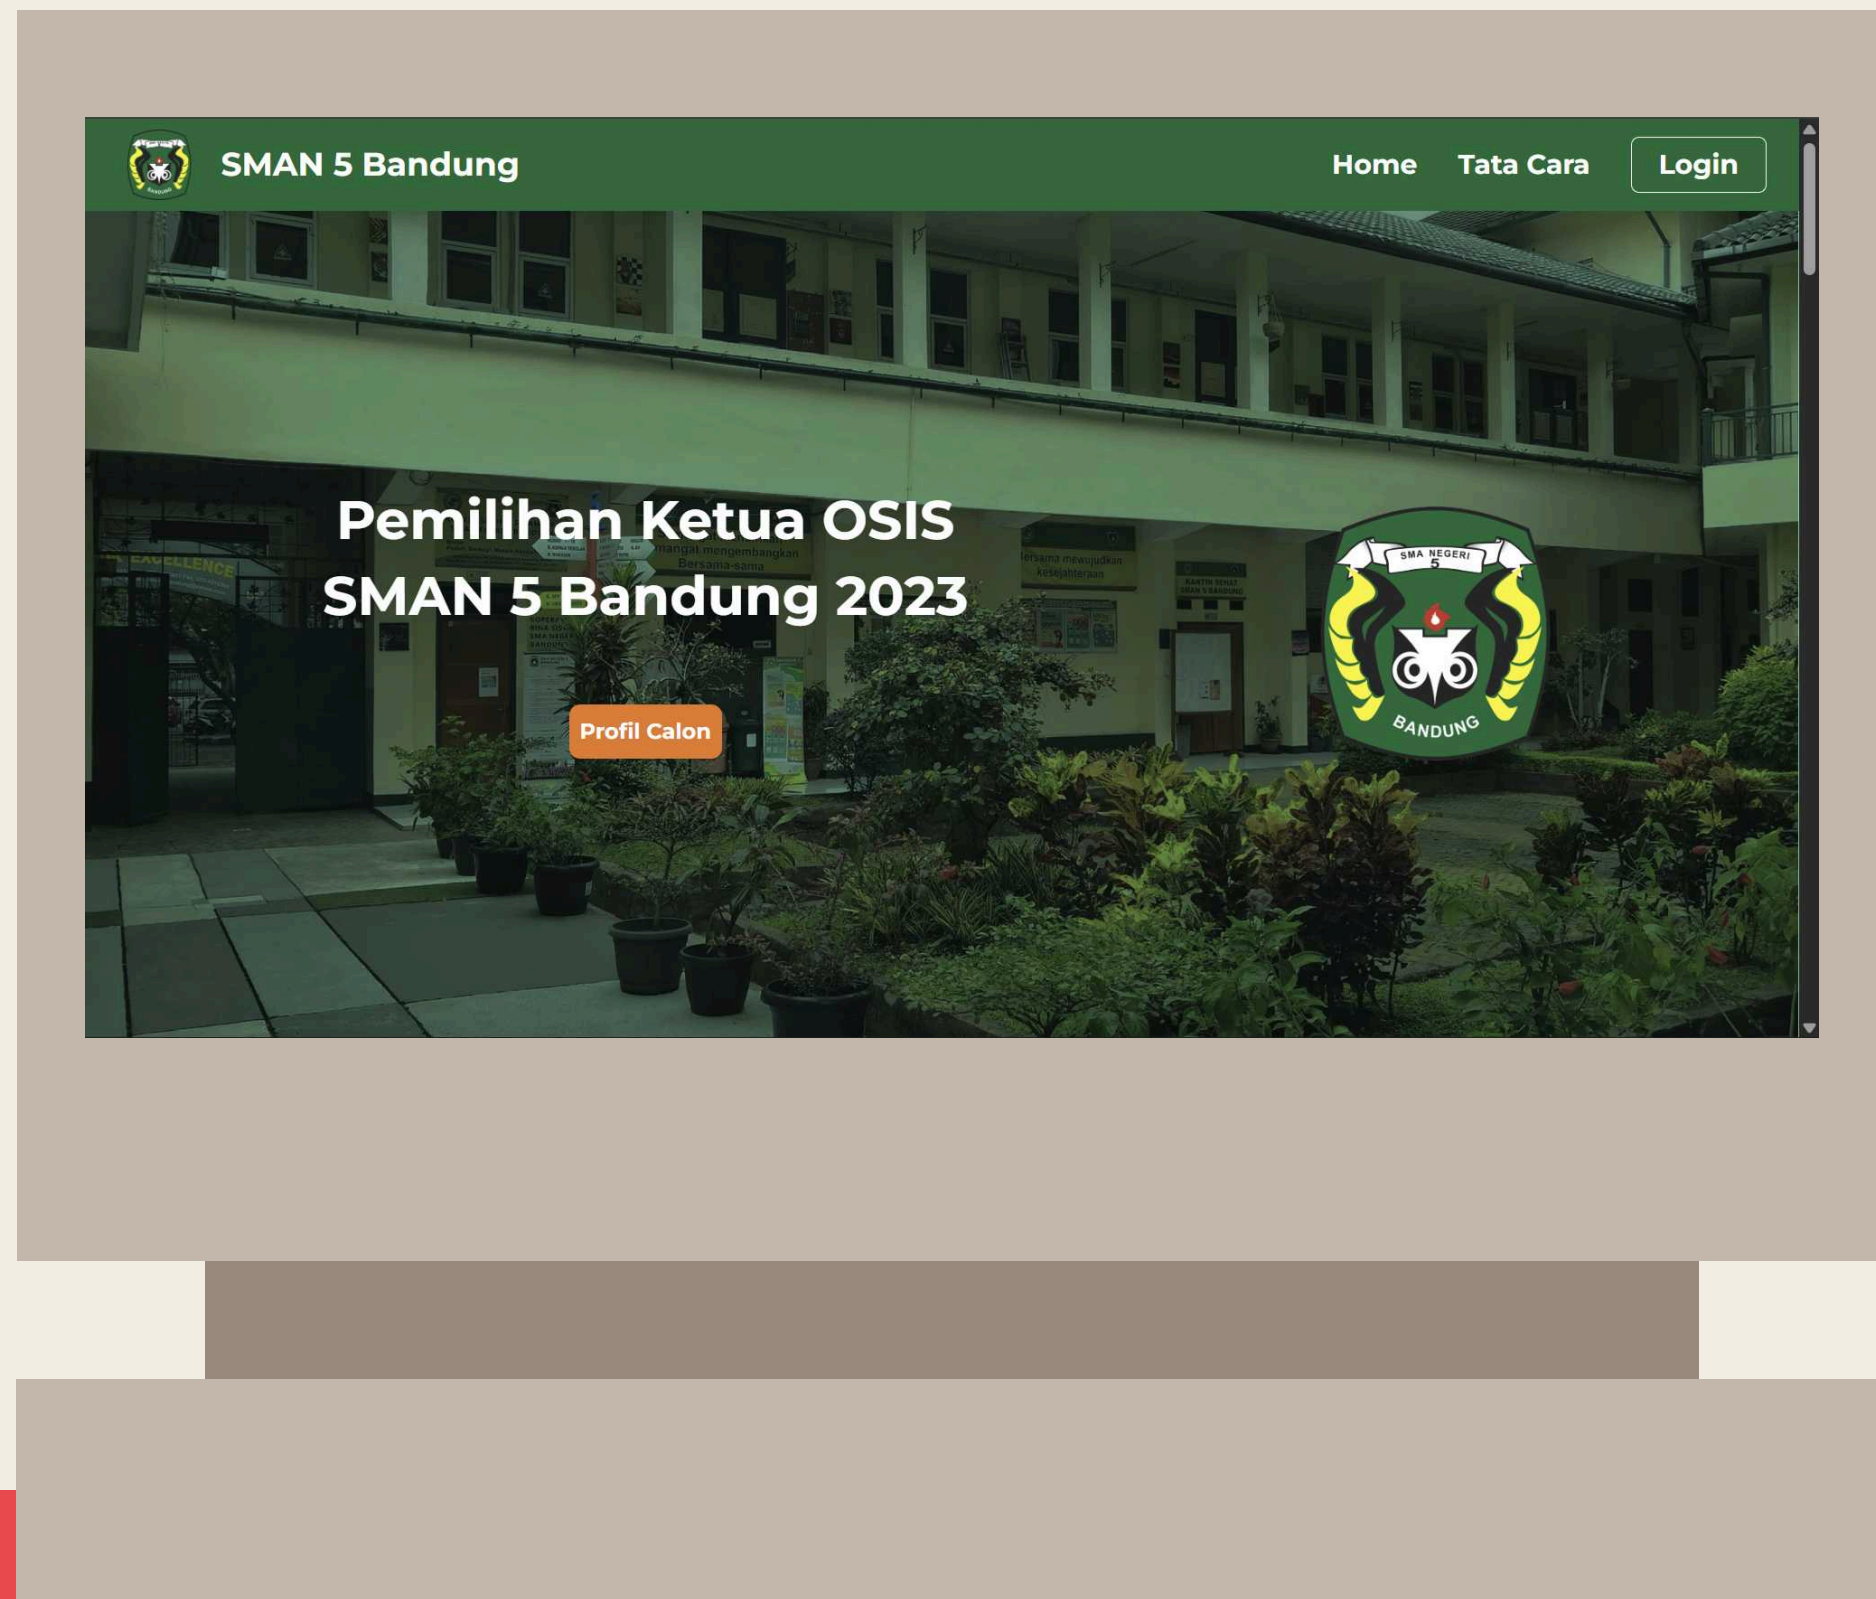

Role: Front-End Developer & UI/UX Designer

Year: 2023

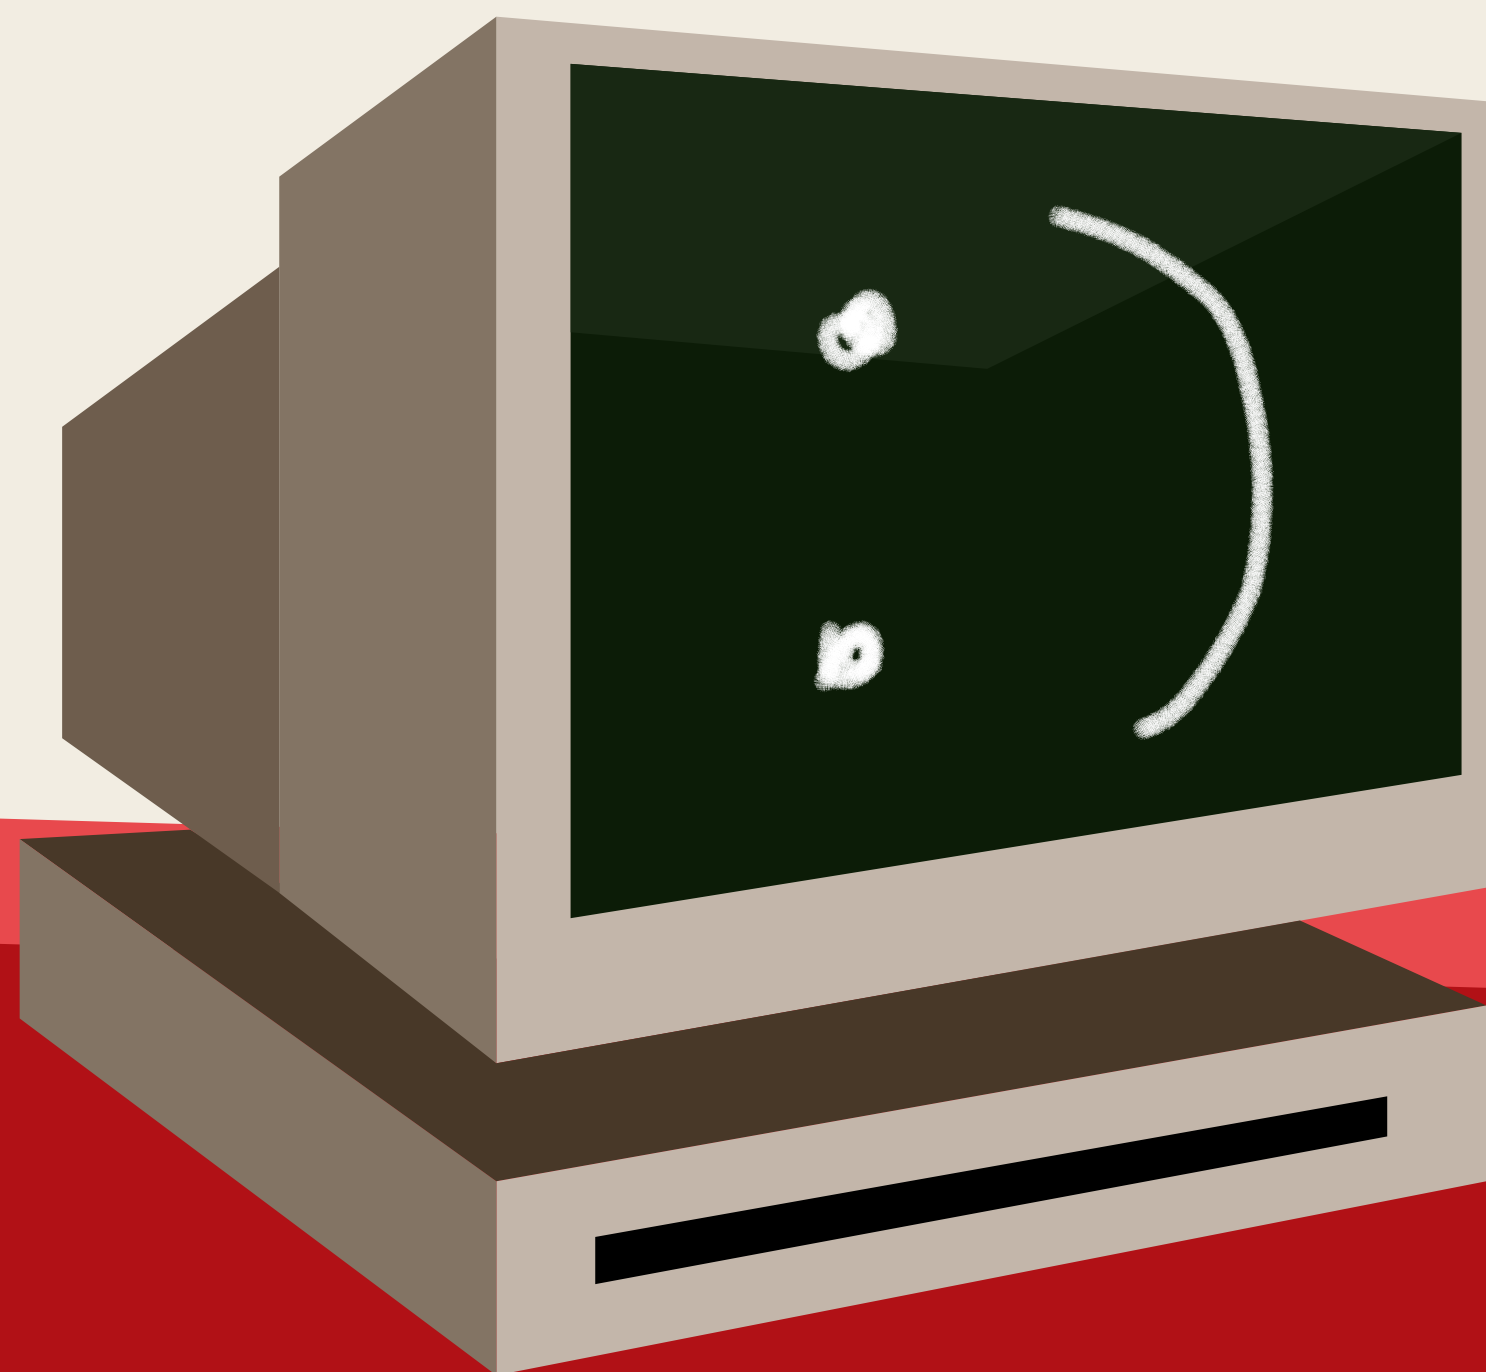

About

Designed an accessible, error-proof e-voting interface for the student council, safely serving over 900 active students. The secure, user-centric flow successfully eliminated invalid voting risks and reduced tabulation time by 80%
